

Pentaho Data Intelligence Fabric

Unified Metadata, Analytics, and Optimization for AI-Ready Enterprises

Know, Trust, Optimize, and Activate Data Across the Entire Lifecycle.

What It Is

Pentaho Data Intelligence Fabric unifies data integration, cataloging, analytics, and optimization into a single intelligent layer. It provides continuous visibility, governance, and activation of data products across hybrid and multi-cloud environments.

Key Capabilities

- Automated discovery and metadata enrichment
- Semantic business glossary powered by machine learning
- Policy-driven data quality, cost, and lifecycle optimization
- Embedded analytics and reporting for operational insight

Business Outcomes

Organizations reduce data friction, accelerate AI initiatives, and lower infrastructure costs while increasing trust and accessibility of enterprise data.
